

## Seminar ECAP

### STRUCTURAL ANCHORS AND CONSTRUCTION PRODUCTS REGULATION

Thursday, 29 September 2016 | 13:00 - 13:30

**Speaker:** Barbara Sorgato, ECAP General Secretary

**Language:** Italian with consecutive interpreting into English

#### Topic

The Construction Products Regulation (EU) N° 305/2011 introduces big changes in the CE marking of European construction products. The challenge is: the European approach.

Will the industry and citizens take this opportunity and show once again that the paths towards Europe are not the national interests of the member states, but the creation of good rules for the common good?

#### Programme

The seminar will outline the point of view of ECAP, a unique instance of a transnational group of SMEs, producers of structural fixing systems, that created their own European identity beyond their national identities to manage the standardisation of their products.

- Who is ECAP?
- The Construction Products Regulation (EU) N° 305/2011: a European law.
- Structural anchors: what changes in EOTA CE marking?
- Consumers and the DoP – Declaration of Performance.
- CE marking and DoP of wood screws: future steps.
